STEMSAGE

# STEMSAGE Website — Complete User Navigation & Journey Guide

## Page-to-Page Navigation, Click Actions & User Flows

| | |
|---|---|
| **Website** | STEMSAGE |
| **Document purpose** | Explains how a user travels through the STEMSAGE website: what happens when a user clicks something, and where the user goes next. It is a navigation and flow reference, not a visual-design document. |
| **Basis** | Based on the actual website implementation, as captured in *STEMSAGE Website — Designer Handoff v2* (repository analysis; source last verified October 2026). That document is the primary source of truth. |
| **Version / date** | Version 1.0 — 1 October 2026 |
| **Audience** | Developers, designers, testers, project reviewers and stakeholders |

# Contents

2. Website Navigation Overview 4
3. Global Header Navigation 5
4. Courses Navigation Flow 6
5. Home Page Navigation `/` 6
6. About Page `/about` 7
7. Services Page `/services` 7
8. Store Page `/store` 8
9. Forum / Blog Navigation `/forum` 9
10. Gallery Navigation `/learning` 10
11. Projects Page `/projects` 10
12. Student Projects Navigation `/student-projects` 11
13. Workshops Navigation `/workshops` 11
14. Contact Page `/contact` 12
15. Login Navigation `/login` 13
16. Signup Navigation `/signup` 13
17. Profile Navigation `/profile` 14
18. Cart Drawer (Header-Driven) 14
19. Footer Navigation 15
20. Mobile Navigation Behaviour 15
21. End-to-End User Journeys 17
22. Access Rules and Redirects 18
Appendix A. Items Not Specified in the Source Document 18
Appendix B. Source Observations 19

## How to read this document

Every clickable element is classified by what it does. Where the source document does not state a destination or result, the guide says so explicitly rather than guessing.

| Action type | Meaning |
|---|---|
| **PAGE** | Browser navigates to another route. The URL changes. |
| **MODAL** | A modal opens on top of the current page. The route does not change. |
| **DROPDOWN** | A header dropdown or mega menu opens (hover menu on desktop; accordion in the mobile drawer). |
| **DRAWER** | The Cart Drawer slides in from the right. It is not a page. |
| **IN-PAGE** | Action stays on the same page (scroll, filter, carousel, toggle, accordion). |
| **AUTH** | Authentication step or redirect (Google sign-in, login gate, logout). |

| Action type | Meaning |
|---|---|
| **FORM** | Form entry, submission and its resulting state (success / error). |
| **EXTERNAL** | Leaves the site or hands off to another system. Used only where the source supports it (Google sign-in). |

**Convention for gaps.** “Destination/action not specified in the source document.” appears wherever the source is silent. Appendix A collects every gap in one place.

# 2. Website Navigation Overview

The site has 14 routes in four groups. Routes below are exactly as listed in the source route table.

```
STEMSAGE WEBSITE
│
├── Main Navigation (header)
│   ├── Home ........................... /
│   ├── About .......................... /about
│   ├── Courses  ▾ [Mega Menu] ......... /courses          (Coming Soon)
│   ├── Services ....................... /services
│   ├── Our Store ...................... /store            (Coming Soon)
│   ├── Our Forum  ▾ [Dropdown] ........ /forum
│   │     ├── Blog ..................... /forum
│   │     ├── Gallery .................. /learning
│   │     └── Student Projects ......... /student-projects
│   └── Contact ........................ /contact
│
├── Community  (reached through the Our Forum dropdown)
│   ├── Blog ........................... /forum
│   ├── Gallery ........................ /learning
│   └── Student Projects ............... /student-projects
│
├── Resources  (linked from Footer and CTAs within pages)
│   ├── Projects ....................... /projects
│   └── Workshops ...................... /workshops
│
└── User Account  (header right-side icon)
    ├── Login .......................... /login            (guests only)
    ├── Signup ......................... /signup           (guests only)
    └── Profile ........................ /profile          (authenticated only)

Global components (not pages):  Cart Drawer · Mobile Nav Drawer
```

## Route table

| Page | Route | Group | Access | Status |
|---|---|---|---|---|
| Home | `/` | Main Navigation | Public | Live |
| About | `/about` | Main Navigation | Public | Live |
| Courses | `/courses` | Main Navigation | Public | Coming Soon |
| Services | `/services` | Main Navigation | Public | Live |
| Store | `/store` | Main Navigation | Public | Coming Soon |
| Forum / Blog | `/forum` | Community | Public (read) | Live |
| Gallery | `/learning` | Community | Public | Live |
| Projects | `/projects` | Resources | Public | Live |
| Student Projects | `/student-projects` | Community | Public | Live |
| Workshops | `/workshops` | Resources | Public | Live |
| Contact | `/contact` | Main Navigation | Public | Live |
| Login | `/login` | User Account | Guest only | Live |
| Signup | `/signup` | User Account | Guest only | Live |
| Profile | `/profile` | User Account | Authenticated only | Live |

**Gallery naming.** The route is `/learning` but the page title shown to users is “STEM Workshops”. The route is the navigation entry point and must not change if the display name is changed.

# 3. Global Header Navigation

The header is sticky and appears on every page except Login and Signup, which use a full-screen overlay with no header or footer. It contains the logo, the main navigation links, the Cart icon and the Profile icon.

| Clicked element | Type | Destination | Route | Result |
|---|---|---|---|---|
| Logo | — | Not specified | — | Destination/action not specified in the source document. |
| Home | PAGE | Home | `/` | Opens the homepage |
| About | PAGE | About | `/about` | Opens the About page |
| Courses | PAGE + DROPDOWN | Courses | `/courses` | Opens the Courses (Coming Soon) page. The Courses entry also carries a hover mega menu (see Section 4). |
| Services | PAGE | Services | `/services` | Opens the Services page |
| Our Store | PAGE | Store | `/store` | Opens the Coming Soon Store page |
| Our Forum | PAGE + DROPDOWN | Forum / Blog | `/forum` | Opens the Forum. The entry also carries a hover dropdown (below). |
| Contact | PAGE | Contact | `/contact` | Opens the Contact page |
| Profile icon (guest) | AUTH | Login | `/login` | Guest is taken to the Login page |
| Profile icon / avatar (signed in) | PAGE | Profile | `/profile` | Opens “My Profile” |
| Cart icon | DRAWER | Cart Drawer | — | Slides in a right-side panel on the current page (see Section 18) |

## Our Forum dropdown

| Dropdown item | Type | Destination | Route |
|---|---|---|---|
| Blog | PAGE | Forum / Blog | `/forum` |
| Gallery | PAGE | Gallery (titled “STEM Workshops”) | `/learning` |
| Student Projects | PAGE | Student Projects | `/student-projects` |

**Logo destination.** The source lists a logo in the header but does not state where it links. “Home” is a separate navigation entry pointing to `/`. Destination/action not specified in the source document.

**Header order (must be preserved):** Home, About, Courses, Services, Our Store, Our Forum, Contact; Cart and Profile icons on the right.

# 4. Courses Navigation Flow

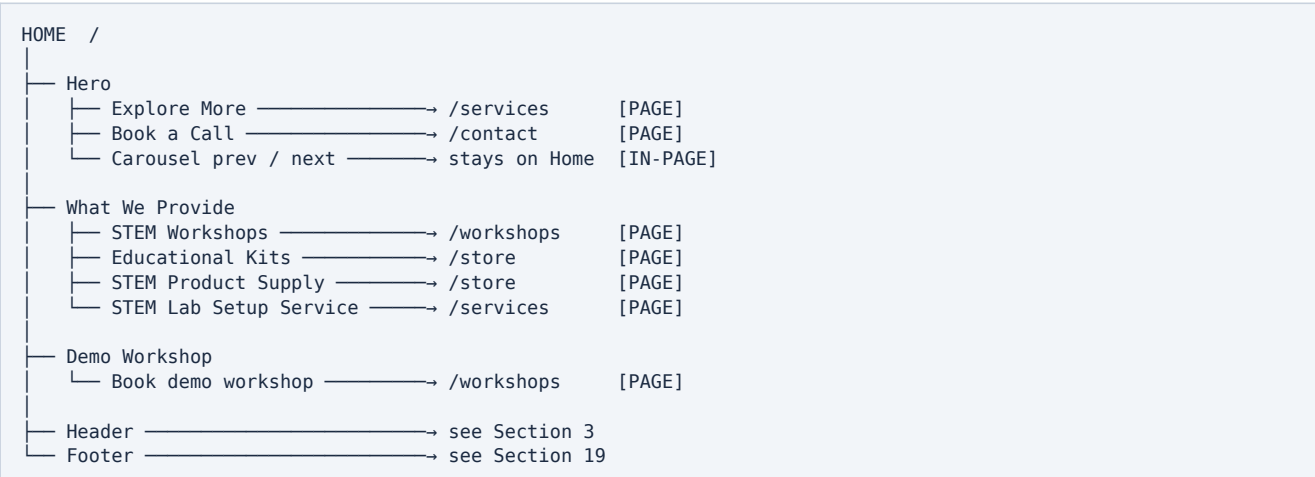

The Courses entry has two behaviours: the label links to `/courses`, and the entry carries a 3-column mega menu (hover dropdown) with 12 course items. The Courses page itself is a Coming Soon placeholder; no course catalogue and no course detail pages exist.

| Clicked element | Type | Result |
|---|---|---|
| Courses (header label) | PAGE | Opens `/courses` — page title “Courses Coming Soon” with an intro description |
| Courses (hover) | DROPDOWN | Opens the mega menu with three category columns |
| Category headings: Electronics (3), Internet of Things (4), Robotics & 3D Design (5) | — | Presented as column headings. Whether headings are clickable: Destination/action not specified in the source document. |
| Any course item (12 in total) | MODAL | Opens the Coming Soon modal for that course. No course detail page exists. |
| Notify Me (modal) | — | Destination/action not specified in the source document. |
| Close (modal) | MODAL | Closes the modal. The modal belongs to the Courses page; the page the user lands on after closing is not otherwise specified. |

**Not specified:** the individual course names under each category; whether a course click made from a different page first navigates to `/courses`; and what Notify Me does. The source notes only that an email-capture / notify-me input is “not yet implemented”. Do not assume a submission flow exists.

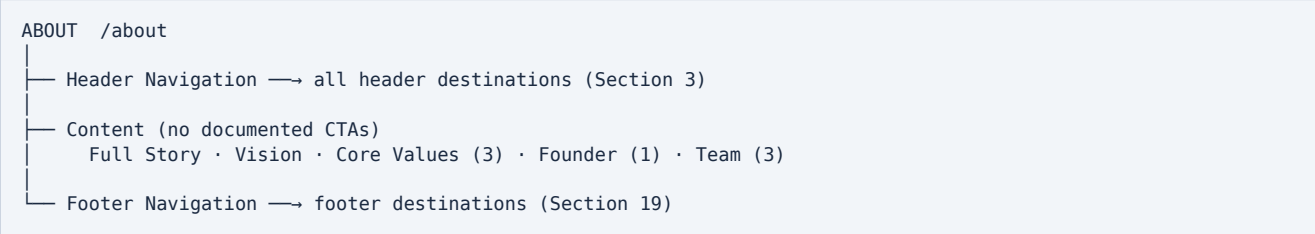

# 5. Home Page Navigation `/`

| Section | Clicked element | Type | Destination | Route |
|---|---|---|---|---|
| Hero | Explore More | PAGE | Services | `/services` |
| Hero | Book a Call | PAGE | Contact | `/contact` |
| Hero | Carousel prev / next arrows | IN-PAGE | Changes the slide (3 slides; also auto-plays and loops) | — |
| What We Provide | STEM Workshops card | PAGE | Workshops | `/workshops` |
| What We Provide | Educational Kits card | PAGE | Store (Coming Soon) | `/store` |
| What We Provide | STEM Product Supply card | PAGE | Store (Coming Soon) | `/store` |
| What We Provide | STEM Lab Setup Service card | PAGE | Services | `/services` |
| Book a Demo Workshop | Book demo workshop | PAGE | Workshops | `/workshops` |

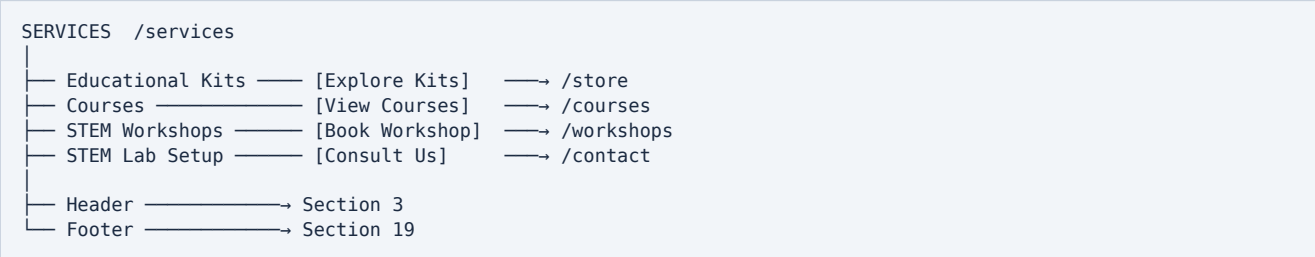

**Home sections with no documented navigation.** The source lists these sections but documents no click destination for them: 5 Doors of Innovation (Electronics, Robotics, IoT, 3D Printing, Programming), Impact Statistics, STEM Teaching Journey, Testimonials. The Association & Socials block contains partner logos / social links; their destinations are not specified. The demo-workshop block includes an embedded video player whose play control is not documented as navigation.

# 6. About Page `/about`

The About page contains text, one founder card and three team-member cards. The source documents no page-specific buttons or links, and none are added here.

# 7. Services Page `/services`

| Service card | CTA label | Type | Destination | Route |
|---|---|---|---|---|
| Educational Kits | Explore Kits | PAGE | Store (Coming Soon) | `/store` |
| Courses | View Courses | PAGE | Courses (Coming Soon) | `/courses` |
| STEM Workshops | Book Workshop | PAGE | Workshops | `/workshops` |
| STEM Lab Setup | Consult Us | PAGE | Contact | `/contact` |

**Cross-page note.** “STEM Lab Setup” leads to `/contact` from the Services page but to `/services` from the Home page (“STEM Lab Setup Service” card). Both are as documented.

# 8. Store Page `/store`

```
STORE  /store
│
└── "Store Coming Soon"  (placeholder: title + description only)
```

According to the source, the Store is a placeholder page. It has no product listings, no cart functionality on the page, no checkout flow and no page-specific buttons. It must not be treated as a functional e-commerce flow.

## Pages that lead to the Store

| From | Element | Route |
|---|---|---|
| Header | Our Store | `/store` |
| Home — What We Provide | Educational Kits card; STEM Product Supply card | `/store` |
| Services | Educational Kits → Explore Kits | `/store` |
| Cart Drawer (empty state) | Browse Our Store | `/store` |

**Cart is separate from the Store page.** The Cart Drawer is a header-driven slide-over available on every page (Section 18). The source says it “can collect items added from within the Store page”, but also states the product catalogue is not implemented. How an item is added is therefore not specified. Cart Checkout redirects to `/contact`.

# 9. Forum / Blog Navigation `/forum`

## 9.1 Entry through the Our Forum dropdown

```
OUR FORUM  [header dropdown]
│
├── Blog ──────────────── /forum
├── Gallery ──────────── /learning
└── Student Projects ──── /student-projects
```

## 9.2 Forum page flow

```
FORUM  /forum
│
├── Read Blog Articles          (public, no login needed)
│   ├── Filter by category  [IN-PAGE]
│   │     All · Electronics · Robotics · Programming · IoT · 3D Design
│   ├── Article list (cards loaded from database)
│   │     Category tag · "Official Article" label · Title · Author · Date · Comment count
│   ├── Empty state (no posts for the chosen filter)
│   └── View article ──→ card click behaviour: not specified
│
└── Create a New Post           (login needed to submit)
    │
    └── [Create a New Post] button ──→ Composer Modal  [MODAL]
          ├── Title ................ text input
          ├── Description / Content  textarea
          ├── Author ............... pre-filled, read-only
          ├── Category ............. selector
          ├── [ Publish ] ──→ article appears in the list
          └── [ Cancel ]  ──→ result not specified
```

| Clicked element | Type | Result |
|---|---|---|
| Category pill (All / Electronics / Robotics / Programming / IoT / 3D Design) | IN-PAGE | Filters the article list; stays on `/forum` |
| Article card | — | Clicking a card to “view” the article is part of the documented flow, but its destination (page or modal) is not specified. Destination/action not specified in the source document. |
| Create a New Post | MODAL / AUTH | Opens the Composer Modal. The source states login is needed to submit. What an unauthenticated user sees when clicking the button or publishing: Destination/action not specified in the source document. |
| Publish | FORM | Publishes the post; the article then appears in the article list |
| Cancel | — | Destination/action not specified in the source document. |

The Forum also uses success / error feedback banners (listed in the source component inventory). Their trigger conditions are not detailed beyond the publish flow above.

# 10. Gallery Navigation `/learning`

```
Header → Our Forum → Gallery
   ↓
/learning   (page title shown: "STEM Workshops")
   ↓
Photo Grid  (masonry layout, 11 images; hover shows an expand icon)
   ↓
Click image
   ↓
Lightbox Modal  [MODAL]  ── route stays /learning
   ├── ‹ Previous  / Next ›  → other image, inside the modal
   ├── Fullscreen toggle     → inside the modal
   ├── Like / heart toggle   → inside the modal
   └── Close (×)             → closes the Lightbox
```

| Lightbox action | Changes page? | Result |
|---|---|---|
| Open (click an image) | No | Opens the Lightbox over the grid |
| Previous (left arrow) | No — stays in modal | Moves to the adjacent image |
| Next (right arrow) | No — stays in modal | Moves to the adjacent image |
| Fullscreen toggle | No — stays in modal | Toggles fullscreen viewing |
| Like / heart toggle | No — stays in modal | Toggles the like state. Persistence / login requirement: Destination/action not specified in the source document. |
| Close (×) | No | Closes the Lightbox; the user remains on the photo grid page |

# 11. Projects Page `/projects`

```
PROJECTS  /projects
│
├── Hero
│   ├── Explore Projects ──→ scrolls to the project grid   [IN-PAGE]
│   └── Student Projects ──→ /student-projects             [PAGE]
│
├── Featured Project
│   └── View Project ──────→ Project Detail Modal          [MODAL]
│
├── All Projects Archive
│   ├── Search input · Category filter bar                 [IN-PAGE]
│   │     All · Robotics · IoT · Electronics · Programming · AI/ML · 3D Design
│   └── Project card → View Project → Project Detail Modal  [MODAL]
│
└── Final CTA
    ├── Explore Student Projects → /student-projects       [PAGE]
    └── Contact STEMSAGE ──────→ /services                 [PAGE]
```

| Clicked element | Type | Destination / result | Route |
|---|---|---|---|
| Explore Projects (hero) | IN-PAGE | Scrolls to the project grid | — |
| Student Projects (hero) | PAGE | Student Projects | `/student-projects` |
| View Project (featured panel) | MODAL | Opens the Project Detail Modal | — |
| View Project (any project card) | MODAL | Opens the Project Detail Modal | — |
| Category filter bar / Search | IN-PAGE | Filters the cards; an empty state shows when nothing matches | — |
| Explore Student Projects (final CTA) | PAGE | Student Projects | `/student-projects` |
| Contact STEMSAGE (final CTA) | PAGE | Services (as documented) | `/services` |

> The “Contact STEMSAGE” button leads to `/services`, not `/contact`. This is preserved exactly as documented.

### Project Detail Modal

```
Project card / Featured panel
   ↓
[ View Project ]
   ↓
Project Detail Modal  [MODAL]
   ├── Status badge + category
   ├── Overview
   ├── Problem
   ├── Solution
   ├── Outcome
   ├── Technologies (tags)
   └── [ Close ] → closes the modal, user stays on /projects
```

## 12. Student Projects Navigation `/student-projects`

```
STUDENT PROJECTS  /student-projects
│
├── Browse Projects
│     Banner notice "Welcome to STEMSAGE" · Hero · Alternating project list
│     (number · title · student name + subtitle · description)
│
└── Submit Your Project  ──→  Submit Modal  [MODAL]
        ├── Student Name ........ input
        ├── Project Title ....... input
        ├── School / Institution  input
        ├── Category ............ selector
        ├── Description ......... textarea
        └── [ Submit ]  ──→  Success state  [FORM]
```

| Clicked element | Type | Result |
|---|---|---|
| Submit Your Project | MODAL | Opens the Submit Modal |
| Submit | FORM | Submits the entry and shows a success state inside the modal |
| Error state / validation | FORM | Destination/action not specified in the source document. |
| Closing the Submit Modal | — | Destination/action not specified in the source document. |
| Top banner notice (“Welcome to STEMSAGE”) | — | Info bar. A link or destination: Destination/action not specified in the source document. |
| Login requirement for submitting | — | Destination/action not specified in the source document. |

## 13. Workshops Navigation `/workshops`

```
WORKSHOPS  /workshops
│
├── Filter Workshops  [IN-PAGE]
│     All · Robotics · Electronics · IoT · Programming · 3D Design · AI
│
├── Workshop card  (status: Open / Full / Coming Soon)
│   │
│   ├── [ View Details ] ──→ Workshop Detail Modal  [MODAL]
│   │          ├── Status · Description
│   │          ├── Date · Duration · Location · Level · Seats · Schedule
│   │          ├── "Includes" tags
│   │          └── [ Register Interest ] ──→ Registration Modal
│   │
│   └── [ Register ] ──────→ Registration Modal  [MODAL]
│                                ├── Full Name · Email · Phone
│                                └── [ Submit Interest ] ──→ Success state  [FORM]
│
└── No navigation to a new page: registration is a modal within /workshops
```

| Clicked element | Type | Result |
|---|---|---|
| Category filter bar | IN-PAGE | Filters the workshop cards; empty state when nothing matches |
| View Details | MODAL | Opens the Workshop Detail Modal |
| Register Interest (in Detail Modal) | MODAL | Opens the Registration Modal |
| Register (on a card) | MODAL | Opens the Registration Modal |
| Submit Interest | FORM | Submits name, email and phone; shows a success confirmation state |
| Button labelled “Full” | — | Appears on the card for full workshops. Resulting action: Destination/action not specified in the source document. |
| Notify Me (card) | — | Appears on the card. Resulting action: Destination/action not specified in the source document. |
| Closing either modal; error state on submit | — | Destination/action not specified in the source document. |

### Workshop status reference

| Status badge | Card button variants listed in source | Documented result |
|---|---|---|
| Open | Register | Opens the Registration Modal |
| Full | Full | Not specified in the source document. |
| Coming Soon | Notify Me | Not specified in the source document. |

The source lists the button variants “Register / Full / Notify Me” alongside the three status badges but does not spell out an explicit status-to-button mapping or what the Full and Notify Me buttons do. The mapping above follows the order in which they are listed and should be confirmed.

## 14. Contact Page `/contact`

```
CONTACT  /contact
│
├── Contact information
│     Email card · Phone card · Location card
│     └── [ Email Us Directly ] ──→ destination/action not specified
│
├── Enquiry Form  [FORM]
│     Full Name · Email · Phone · Subject (dropdown) · Message
│     └── [ Send Message ] ──→ Success state  or  Error state
│
└── FAQ  (4 items)  ──→ expand / collapse  [IN-PAGE]
```

| Clicked element | Type | Result |
|---|---|---|
| Email Us Directly | — | Destination/action not specified in the source document. (Not documented as a mail link, a scroll to the form, or anything else.) |
| Send Message | FORM | Submits the enquiry; the page shows a success or an error state |
| FAQ item | IN-PAGE | Accordion Q&A (4 items) on the same page |
| Email / Phone / Location cards | — | Display cards. Click actions: Destination/action not specified in the source document. |

**Pages that lead here:** Header “Contact”; Home “Book a Call”; Services “STEM Lab Setup → Consult Us”; Cart Drawer “Proceed to Checkout”.

# 15. Login Navigation `/login`

Login uses a full-screen overlay (white background, no header or footer). It is for guests only.

```
Unauthenticated user
       ↓
Header profile icon  [AUTH]
       ↓
/login   (heading "Log In")
       │
       ├── "New to this site? Sign Up" ──────→ /signup           [PAGE]
       │
       ├── Google Sign-In  [AUTH / EXTERNAL]
       │       ↓
       │   Google pop-up / prompt
       │       ↓ success
       │   Authenticated (stored in browser session)
       │       ↓
       │   Redirect to Home  /
       │       (failure → error banner on the Login page)
       │
       ├── "Log in with Email" ──────────────→ UI placeholder, not functional
       │
       └── Close (×) ──────────────────────→ Home  /          [PAGE]
```

| Clicked element | Type | Result |
|---|---|---|
| Close (×) | PAGE | Goes back to Home `/` |
| New to this site? Sign Up | PAGE | Opens `/signup` |
| Google Sign-In button | AUTH / EXTERNAL | Shows the Google pop-up / prompt. On success the user is authenticated (kept in the browser session) and redirected to Home `/` |
| Error banner | — | Shown conditionally on the page when an error occurs (e.g. a failed sign-in). It has no documented click action. |
| Log in with Email | — | Not yet functional — UI placeholder. No destination. |

# 16. Signup Navigation `/signup`

Signup shares the same full-screen overlay pattern as Login and is for guests only.

```
Signup  /signup   (heading "Sign Up")
│
├── "Already a member? Log In" ──→ /login                    [PAGE]
│
├── Google Sign-Up  [AUTH / EXTERNAL]
│       ↓
│   Google pop-up / prompt
│       ↓ success
│   Authenticated (stored in browser session)
│       ↓
│   Redirect to Home  /
│
├── "Sign up with email" ──────→ UI placeholder, not functional
│
├── Footnote: public profile notice (information only)
│
└── Close (×) ──────────────────→ Home  /                    [PAGE]
```

| Clicked element | Type | Result |
|---|---|---|
| Close (×) | PAGE | Goes back to Home `/` |
| Already a member? Log In | PAGE | Opens `/login` |
| Google Sign-Up button | AUTH / EXTERNAL | Google pop-up / prompt; on success the user is authenticated and redirected to Home `/` |

| Clicked element | Type | Result |
|---|---|---|
| Sign up with email | — | Not yet functional — UI placeholder. Email signup does not currently work. |

The source describes the post-Google-authentication result as a redirect to Home for the authentication journey. It does not give separate wording for first-time sign-up versus returning login, so both are documented the same way here.

# 17. Profile Navigation `/profile`

Profile is authenticated-only. Unauthenticated users must always be redirected to Login. The page includes the header and footer.

```
Authenticated user
       ↓
Header profile avatar
       ↓
/profile  ("My Profile")
       │
       ├── VIEW MODE (default)
       │     ├── Personal Information: Full Name · Email (read-only) · Phone · Gender
       │     └── Account Information: Authentication method · Verification status · Role
       │
       ├── Photo upload  [IN-PAGE]
       │     camera overlay on avatar hover  /  "Upload Photo" button
       │
       ├── [ Edit Profile ] ──→ toggles EDIT MODE  [IN-PAGE]
       │         ├── Full Name · Phone · Gender · Profile Picture URL (editable)
       │         ├── Email · Auth Provider (read-only)
       │         ├── [ Save Changes ] ──→ success / error feedback banner
       │         └── [ Cancel ]       ──→ not specified
       │
       └── [ Logout ] ──→ /login   [AUTH]

Guest opens /profile  ──→  redirected to /login   [AUTH]
```

| Clicked element | Type | Result |
|---|---|---|
| Header profile icon / avatar (signed in) | PAGE | Opens `/profile` |
| Upload Photo / camera overlay | IN-PAGE | Starts a profile photo upload. Success and error feedback appears as banners. |
| Edit Profile | IN-PAGE | Toggles Edit mode on the same page (no route change) |
| Save Changes | FORM | Saves the edited fields; a success or error feedback banner is shown |
| Cancel | — | Destination/action not specified in the source document. |
| Logout | AUTH | Ends the session; the user is redirected to `/login` |
| Unauthenticated visit to /profile | AUTH | Redirected to Login `/login` |

The source does not state where an already-authenticated user is sent if they open `/login` or `/signup` (both are “guest only”). Destination/action not specified in the source document.

# 18. Cart Drawer (Header-Driven)

The Cart Drawer is a slide-over panel from the right, available from the header on every page. It is not a page and has no route.

```
Any page
   ↓
Header Cart icon  [DRAWER]
   ↓
Cart Drawer slides in (right side)
   │
   ├── If EMPTY
   │      └── [ Browse Our Store ] ──────→ /store      [PAGE]
   │
   └── If it HAS ITEMS
         ├── Item list with quantity controls   [IN-PAGE, inside the drawer]
         ├── Subtotal display
         └── [ Proceed to Checkout ] ──→ /contact    [PAGE]
```

| Clicked element | Type | Result |
|---|---|---|
| Cart icon (header) | DRAWER | Opens the Cart Drawer on top of the current page |
| Browse Our Store (empty cart) | PAGE | Opens `/store` |
| Quantity controls (cart has items) | IN-PAGE | Adjust item quantities inside the drawer |
| Proceed to Checkout (cart has items) | PAGE | Redirects to `/contact` |
| Closing the drawer | — | Destination/action not specified in the source document. |

# 19. Footer Navigation

The footer appears on all pages except Login and Signup. The source describes a multi-column footer with links, an address and a copyright line. Its column structure must be preserved: Company links, Resources links, Address.

| Footer column | Documented destinations | Route |
|---|---|---|
| Resources links | Projects | `/projects` |
| Resources links | Workshops | `/workshops` |
| Company links | Individual link labels and destinations: Destination/action not specified in the source document. | — |
| Address | Display information. Click action: Destination/action not specified in the source document. | — |
| Copyright | Display information | — |

The source states that Projects and Workshops are “linked from Footer & CTAs within pages”. It does not list the Company links individually, so none are named here.

# 20. Mobile Navigation Behaviour

On mobile, the header navigation is replaced by the Mobile Nav Drawer: a full-screen slide-down menu with accordion dropdowns, available on all pages.

```
Mobile header
   ↓
Menu control (opens the Mobile Nav Drawer)  [DROPDOWN]
   ↓
Full-screen slide-down menu
   ├── Main links → same destinations as Section 3
   └── Accordion dropdowns (expand / collapse)
         ├── Courses  → course categories → item → Coming Soon modal
         └── Our Forum → Blog · Gallery · Student Projects
```

| Behaviour | Documented in source? |
|---|---|
| Mobile Nav Drawer: full-screen, slides down, accordion dropdowns | Yes (component inventory) |

| Behaviour | Documented in source? |
|---|---|
| Which header entries become accordions | Courses and Our Forum are the dropdown entries on desktop; the source does not list accordion contents separately. |
| Exact control used to open / close the drawer; close behaviour after a link is chosen | Destination/action not specified in the source document. |
| Cart and Profile icon placement on mobile | Destination/action not specified in the source document. |
| Cart Drawer, modals and lightbox on mobile | Same components; mobile-specific behaviour: Destination/action not specified in the source document. |

# 21. End-to-End User Journeys

## 21.1 Visitor exploration

```
Home /
  ├─→ scroll Home sections (Carousel → 5 Doors → Services → Demo CTA → Testimonials)
  └─→ navigate with the Header or Home CTAs
          ├─ About ............ company information
          ├─ Services ......... offerings
          ├─ Courses .......... Coming Soon
          ├─ Workshops ........ browse and register interest
          ├─ Projects ......... STEMSAGE projects
          ├─ Store ............ Coming Soon
          ├─ Forum ............ blog articles
          ├─ Gallery .......... workshop photos
          └─ Student Projects . student work
                  ↓
          Contact /contact → send an enquiry through the form
```

## 21.2 Authentication

```
Visitor → Header profile icon → /login ⇄ /signup
                                    │
                                Google sign-in → Google pop-up
                                    │ success
                                Authenticated (browser session) → Home /
                                    │
                                Header avatar → /profile
                                    ├─ view info · upload photo · edit name / phone / gender
                                    └─ Logout → /login
```

## 21.3 Community / Forum

```
Our Forum /forum
  ├─ Read blog articles (no login) → filter by category
  ├─ Write a post (login needed to submit) → Composer Modal → Publish → appears in list
  ├─ Gallery /learning → photo grid → Lightbox
  └─ Student Projects /student-projects → browse → Submit Your Project → Submit Modal → success
```

## 21.4 Workshop registration

```
/workshops → browse / filter cards
  ├─ View Details → Workshop Detail Modal → Register Interest ─┐
  └─ Register ──────────────────────────────────────────────────┤
                                                               ↓
                                  Registration Modal → Submit Interest → Success state
                                  (stays on /workshops; no new page)
```

## 21.5 Cart

```
Any page → Cart icon → Cart Drawer
   ├─ Empty ........... Browse Our Store → /store
   └─ Has items ...... Proceed to Checkout → /contact
```

# 22. Access Rules and Redirects

| Situation | Rule from the source |
|---|---|
| Unauthenticated user wants Profile | Header profile icon leads to `/login`. Unauthenticated users must always be redirected to Login from `/profile`. |
| Successful Google login or signup | Redirect to Home `/` |
| Logout | Redirect to `/login` |
| Close (×) on Login or Signup | Go back to Home `/` |
| Reading the Forum | Public; no login needed |
| Submitting a Forum post | Login needed to submit |
| Workshop registration | Modal within the page; does not navigate to a new page |
| Cart Checkout | Redirects to `/contact` |
| Courses and Store | Coming Soon placeholders; every course item opens the Coming Soon modal |
| Authenticated user opens /login or /signup | Destination/action not specified in the source document. |

# Appendix A. Items Not Specified in the Source Document

Each item below is a click target or behaviour that appears in the Designer Handoff v2 but has no stated destination or result. They are listed so that developers and testers can confirm them rather than assume them.

| # | Area | Item |
|---|---|---|
| 1 | Header | Logo click destination |
| 2 | Courses | Whether category headings are clickable; Notify Me action; page the user lands on after closing the Coming Soon modal; behaviour of a course click made from another page |
| 3 | Home | Destinations for 5 Doors icons, Association & Socials links, testimonial controls, video play control |
| 4 | Forum | Article card click (“view article”); Cancel in the Composer Modal; behaviour for a guest who clicks Create a New Post or tries to publish |
| 5 | Gallery | Persistence or login requirement for the like toggle |
| 6 | Student Projects | Banner notice link; modal close behaviour; submission error state; login requirement |
| 7 | Workshops | “Full” button result; Notify Me result; modal close behaviour; submission error state; explicit status-to-button mapping |
| 8 | Contact | Email Us Directly destination; click actions on Email / Phone / Location cards |
| 9 | Profile | Cancel result in Edit mode |
| 10 | Auth guards | Where an authenticated user is sent when opening /login or /signup |
| 11 | Cart | How items are added (the Store has no catalogue); how the drawer is closed |
| 12 | Footer | Individual Company link destinations; Address click action |
| 13 | Mobile | Open / close control for the Mobile Nav Drawer; mobile placement of Cart and Profile icons |

# Appendix B. Source Observations

| Observation | How it is handled in this guide |
|---|---|
| The Gallery route is `/learning` but the page title is “STEM Workshops”. | Route preserved exactly; both names shown. |
| Projects “Contact STEMSAGE” leads to `/services`. | Preserved as documented; flagged in Section 11. |
| “STEM Lab Setup” leads to `/services` from Home but `/contact` from Services. | Both preserved; noted in Section 7. |
| The Visitor journey in the source labels the final step “Contact Page (/)”. The source route table lists Contact as `/contact`. | The route table is treated as authoritative: `/contact`. |
| The Store note says the cart can collect items from the Store page, yet no product catalogue exists. | Cart documented separately (Section 18); item-adding flow listed as not specified. |
| Login and Signup email buttons are not functional. | Documented as UI placeholders in Sections 15 and 16. |

*End of document. Generated from STEMSAGE Website — Designer Handoff v2; no routes, pages or flows were added beyond that source.*
